Subject: Sell out to Microsoft`

To DOJ;

It sure looks like MS got everything it wanted. The must have donated a lot of money to the Bush campaign. Looks very very suspicious.

Microsoft should not be allowed to control both the Operating System and the Applications. They repeatedly have demonstrated a willingness to engage in unethical behaviour to push their poor quality product on users. The OS and the APPS should be split into separate companies. MS also spies on its users by gathering data about them through the OS and various Apps. This practice should be illegal, corporate entities can be trusted only to "maximize stakeholders wealth", within or outside the law depending on consequences. Corp's will misuse the data absolutely without doubt and should be barred from gathering it at all.

Sell Out Sell Out Sell Out. DOJ cannot be trusted to act in the best interests of society.

Andrew Peck

P.S. If I was an American I would be ten times more pissed off with my own government.
